BOYNTON-WADDELL

BOYNTON-WADDELL COMPANY welcomes this opportunity to present **THE BOOK OF EMBOSSED WOOD MOULDINGS**. Compiled here is a complete selection of patterns which encompasses the history of furniture style and design.

Made in America by American craftsmen, only genuine furniture hardwoods are used in their manufacture. Attractively priced, **BOYNTON-WADDELL EMBOSSED WOOD MOULDINGS** find acceptance throughout the furniture and decorative woodworking industries.

We hope that **THE BOOK OF EMBOSSED WOOD MOULDINGS** conveys the spirit of progress that exists in both their manufacture and the fields that use wood mouldings. If in presenting our old and newest designs we stimulate someone to create an outstanding product we will consider it a double reward. First to be able to serve you and secondly to give the public an outstanding product.

BOYNTON-WADDELL COMPANY

BOYNTON-WADDELL

GENERAL INFORMATION

ILLUSTRATIONS: unless otherwise noted are approximately full size. Measuring the illustration will enable you to determine the size of the pattern repeat, the widths of the embossed member, etc. If complete detail is needed, let us send you an actual sample.

SIZES AND SHAPES: Sizes listed below each illustration in **BOLD TYPE** are standard for the pattern number shown. Other standard sizes available are listed in Regular type. Variations of thickness can be produced readily, in some cases with interesting results (see photo).

While the embossed sections are determined by tool size they may be applied to your own specifications of widths and profiles. For further information on special shapes see page **7**. If you have a special requirement, a sketch of the cross section desired will prompt a quotation.

LENGTHS: Furnished in random lengths (board yield) of from three to twelve feet, pieces will average seven feet or more in length. Rough dimension lengths are available at extra cost.

1501 — 3/8 X 1-5/8 in.

1501A — 3/16 X 1-5/8 in.

GENERAL INFORMATION Cont'd

WOODS USED IN EMBOSSED MOULDING THEIR ADVANTAGES AND LIMITATIONS

The following woods are listed in order of their cost with the first (Sap Gum) being most economical.

SAP GUM: Is predominantly a light colored wood with some uncontrollable variations in color intensity. It has a tendency to crush with more intricate patterns. It will receive dark stains very readily, i.e., (Walnut, etc.)

BEECH: Is of a uniform color although darker than the maples. It will emboss well although some checks may develop. It has very little tendency to curl even on the smaller mouldings.

BASSWOOD: Is light in color, is soft and embosses very clearly on most patterns. One of the better woods for embossing.

SOFT MAPLE: Is light colored with a minimum amount of mineral streaking. It embosses well and has little tendency to curl but may fracture on some patterns.

HARD MAPLE: Light colored with more mineral streaks than Soft Maple, it embosses very well and has little tendency to curl.

WHITE OAK:

RED OAK: Embosses satisfactorily on most patterns, but has a tendency for checking. It is prone to darken by the embossing process.

BIRCH: Light in color, embosses very well but does have some tendency to curl. Air dried Birch is used primarily where bending is desirable.

MAHOGANY: Is red in color, embosses very well and has little or no tendency to curl. Considered one of the better woods for embossing.

BOYNTON-WADDELL

GENERAL INFORMATION Cont'd

WALNUT: Is normally very dark in color, embosses well but small knots may cause some chipping. Walnut comes in shorter lengths than other woods.

The above listed woods are the ones most commonly used for embossed wood mouldings. Other woods may be used when required.

We will be happy to run any moulding to exact specifications of customer requirements, within the limits of the wood specified.

FINISHES: Since our mouldings are made of real furniture woods, **BOYNTON-WADDELL EMBOSSED WOOD MOULDINGS** require no special finishes or preparation. Usually furnished "in the white" they are applied before and finished along with the rest of the piece.

MOULDINGS PREFINISHED for contrasting effects can be supplied. Metallic finishes, Bright or Antique have applications on mirror frames, case highlighting, etc. While we will gladly match other contrastingly finished items, such as metal grilles or hardware, we do not attempt to match finished surfaces of furniture by prefinishing. This is almost an impossibility.

STANDARD FINISHES: Gold, Gold with Glaze, Silver, Silver with Glaze, Brass, Brass with Glaze, Copper, Copper with Glaze, Black (Wrought Iron) Silver with Glaze wiped off. Gold with Glaze wiped off. White with Gold Glaze wiped off. Gold with White Glaze wiped off. Copper with Glaze wiped off.

GENERAL INFORMATION Cont'd

STOCK: Because of the endless possibilities of sizes, woods, patterns, etc., production quantities are not carried in stock. Instead each order is run to your exact specifications. However, we do attempt to keep on hand small lots of the patterns shown for sampling purposes.

PRICES: For the same reasons stated above, it is not possible to offer a price list. A quotation to your requirements will be submitted promptly upon request.

SAMPLES: If samples are desired, please note pattern number and dimensions. Small samples will be forwarded promptly and without charge or obligation.

WHEN ORDERING: Pattern number covers design and width and thickness unless your requirements demand different thickness than those listed in this catalog. When ordering please be sure to state pattern number, width, thickness, wood and quantity.

INDEX:

AN INDEX BY WIDTH: of standard Boynton-Waddell embossed mouldings may be found on Page 8 This index is a quick reference to mouldings by size (width) and each page is marked in the upper outside corner with the standard sizes on that page.

AN INDEX BY NUMBER AND PAGE, of all standard Boynton-Waddell mouldings may be found on page 92 of this catalog.

BOYNTON-WADDELL

COMBINATION DESIGNS: Special combination patterns of Boynton-Waddell embossed mouldings may be developed to meet specific customer requirements. The following series of photographs will give an idea of how one design was developed using several embossed patterns on the same moulding, to meet a customer's particular application. These combination designs may be manufactured in an infinite variety of mixtures using any of the Boynton-Waddell patterns. If you need a special application design or combination pattern, please feel free to call on us for assistance.
